

Mortar Permeability Mold

This mold is used to make cement waterproof sample.

Model	QRMPM-901
Container	Brass
Dimension (mm)	Ø150 × 40
Weight (kg)	2

Mortar Penetration Tester

This tester is used to measure concrete setting time by the mortar penetration resistance or decide variable effects of properties of cement proportion admixtures setting and hardening.

Model	QRMPT-902
Type	Washington type
Capacity	7 ℓ
Gauge	Air - craft, stainless waterproof type
Range	0 ~ 10 %
Scale	0.1 ~ 0.2 %
Container	Ø204 × 215 mm
Dimension	± Ø250 × 480 mm
Measurement	Both use water, no water
Weight (kg)	4.5

Vibration Table

This table is used to harden hydraulic concrete and cement and remove bubble.

Model	QRVT-901
Operation Type	Motor
Vibration Speed	5 ~ 60
Table Size	400 × 400
Motor	200 W
Power	220 V
Dimension (mm)	450 × 450 × 500
Weight (kg)	80
